EDUCATION

Indian Institute of Information Technology Raichur, Karnataka

12/2021- Present

Bachelor of Technology in Computer Science & Engineering

CGPA: 8.10

Coursework: Object-Oriented Programming, Data Structures & Algorithms, Embedded Systems, Discrete Maths, Linear Algebra, Calculus, Physics, Probability & Statistics, DBMS, Computer Networks

TECHNICAL SKILLS

Languages: C++, C, JavaScript, Python, SQL, HTML

Full-Stack Skills: ReactJS, ExpressJS, NodeJS, MongoDB, REST API, Tailwind CSS

Tools: GitHub, VS Code, Canva, Postman API

Soft Skills: Teamwork, Event Management, Public Speaking, Leadership

EXPERIENCE

99isolutions

06/2024 - 07/2024

Software Developer Intern

Jaipur, India

- Developed a responsive web application using Node.js that processed over 100,000 transactions per month, improving system responsiveness and ensuring seamless user interactions during peak usage hours.
- Researched WhatsApp flow, creating a data collection system that stores user data in JSON format.
- Integrated advanced real-time functionalities utilizing JavaScript and React.js, enhancing application performance; achieved a 50% decrease in downtime reported by users, fostering increased trust and reliability in the platform.
- Mastered real-time application development, API integration, and advanced debugging techniques, contributing to improved system reliability and functionality.

Indian Institute Of Information Technology

03/2023 - 12/2023

Teaching Assistant

Raichur, India

- Provided data structure tutoring from basic to advanced levels and assisted in designing papers and assignments.
- Designed lab question papers and lab exams, and guided students on how to attempt these questions, helping them understand a wide range of concepts.

PROJECTS

Real Estate Platform | *MongoDB, Express.js, React, Node.js, Tailwind CSS, Postman API*

- Designed and implemented a robust authentication system leveraging JWT, Firebase, and Google OAuth, enhancing security and user access across platforms.
- Led the development of full-scale CRUD operations, enabling efficient property listings management via MongoDB.
- Engineered a suite of user-centric functionalities, including image uploads and comprehensive property management tools, significantly improving user experience.
- Developed and launched an advanced search algorithm, optimizing the precision and speed of user queries, facilitating faster and more accurate property discoveries.

Advanced Stock Prediction Model | *Neural Networks: RNN, LSTM, GRU*

- Presented research findings at SpliTech 2024, facilitating discussions with over 100 attendees and fostering engagement on innovative applications of deep learning in stock market predictions.
- Engineered a cutting-edge predictive model using advanced neural network architectures including RNN, LSTM, and GRU, achieving high-accuracy forecasts of future stock prices that outperform traditional financial models.
- Transformed financial decision-making processes by integrating state-of-the-art predictive analytics, enabling stakeholders to make more precise, data-driven investment choices.
- Applied deep learning techniques to comprehensively analyze vast datasets of historical financial data and current market trends, significantly enhancing the predictive power and reliability of financial forecasts.

CO-CURRICULAR

- Campus Ambassador** for Stockgro at the Indian Institute of Information Technology Raichur.
- Founder and Coordinator of **FINSPIRATION** Club, the Finance Club of IIITR.
- Public Relations Council member skilled in crafting creative content for impactful communication.
